

Vertical Lifeline System Skytac

Product information

Height access system with fall-arrest device at a fixed guidance EN 353-1.

The Skytac Height Access System allows for fall-proof climbing up and down to any height and depth at installed vertical ladders. The climbing protection rail with a C-profile is made of hot-dip galvanized, 3 mm steel, and the rungs are provided with an extra zinc layer for better protection against corrosion.

Speed, the new patented runner for height access systems from SKYLOTEC is ahead of its time. While work on improving the safety standard EN 353-1 for guided type fall arresters on a rigid anchor line continues, we have solved the problem: With our new runner SPEED. [... Read more](#)
