

Lashing Carry - inside

Product information

General: Carry is an interior lashing that fits well in most transport vans and lorries. Interior lashings come standard with end fittings with latch (EF-fitting) as they fit most rails on the market. Can also be supplied with dry-band that are water repellent and keep away dirt, for a longer life cycle.

Marking: According to standard

Standard: EN 12195-2

Note: Standard version is with double hook but can also be supplied with other fitting on request.
