## Lifting Triangle

Product information

## CERTEM

General: The lifting triangle has the same function as a short beam or a spreader. Given working load limits are valid for a maximum top sling angle of $90^{\circ}$. For top angles between $90^{\circ}-120^{\circ}$ working load limit shall be reduced by $30 \%$. All lifting triangles are supplied with 2 shackles according to table. Working load limit in the centre shackle hole is equal to the working load limit of the shackle according to the table.
Design: Cut sheet metal. Wear plates and spacers for the shackles.

Proof: Batch proof $2 \times$ WLL

Material: Plate of high-strength structural steel.
Marking: WLL and CE-marking.
Finish: Yellow painted.
Note: Other loads and dimensions are available on request.
