

Roundsling – slim

Tootekirjeldus

A very compact type of roundsling, easy to use, especially on smaller hooks. Besides its compacted design another advantage is its stiffness, which is provided by the elasticated web in sleeving. This makes it easier for the user to handle the sling when there is a need to wrap the sling around the cargo through small lifting points or underneath the lifted cargo where spaces are limited. The sling is also easy to use in confined spaces or aloft.

Elongation: 2-3%.
