CORDURA® EXTREEMA® Slings & Protections

Product information

Lift-Tex® Industrie B.V. continuously invests in R&D. By listening to the customers needs they have developed a new version of their EXTREEMA® Heavy Lift Slings & Protections.

The latest development of EXTREEMA® Roundslings with Cordura® covers consists of 100% Dyneema® core yarns and a sleeve made of 100% Cordura® or a blend of Dyneema® and CORDURA®. Each version of EXTREEMA® has its own characteristics.

These new variations of slings and protections will be a perfect fit for lifting objects with small D:d ratios (pressure influence on the sling), friction due to limited trunnion or anchoring space.

Known for its resistance to abrasions, tears and scuffs, the super-durable fiber CORDURA® is a primary ingredient in many of the world's leading high-performance gear. And now also available in the Heavy Lift industry for protection of the rounds lings against heat by friction, pressure, etc.

Please let us assist you in ordering the right product for your individual lifting job.
